THE SONIC SIDEGRIP®

Vibratory Pile Driver is an excavator-mounted attachment with an articulating side grip that speeds the pile driving process on any job site. Manufactured in the U.S.A., the Sonic SideGrip® uses an excavator’s hydraulics to safely and quickly pick up, unload, place, drive and extract piling. This innovative pile driver solution is designed to overcome obstacles such as low overhead clearance and narrow passageways, as well as eliminate the need for peripheral equipment to be used in the piling operation.

50’

OF PILE

The Sonic SideGrip® can handle pile up to 50’ long, H-beams, pipe pile and wood pile.

360°

OF ROTATION

The 360° rotation and the three axis of movement allow for full range of motion.

1°

OF PLUMB

Optional Auto II Steering System® utilizes angle sensors to automatically correct the straightness of the pile to within 1° of plumb.
FROM THE GROUND UP
From design to completion- Hercules has designed and developed the Sonic SideGrip® from the ground up while improving and enhancing capabilities, as the industry has grown providing an industry leading pile driving solution.

COMPETITIVE BIDDING SOLUTION
The Sonic SideGrip® will give you an edge in every competitive bidding process. Utilizing the side-gripping jaws and auto steering system, the SSG gives you shorter job completion time, reduced job costs, and a higher production rate.
